**Jesus didn't say,
"Pick up your pillow."**

He said, "Pick up your cross."

@chasingbetter

That means there will be weight.

There will be struggle.

There will be days you wonder if you
can keep going.

But it's in that very struggle that strength is
born. Every sacrifice, every prayer, every act
of obedience is shaping you into someone
the old you wouldn't even recognize.

The cross was never meant to make you
comfortable. It was meant to make you
faithful.

Thank You

We are glad you joined us today. We pray that you will experience
God's presence as we share the wisdom found in HIS WORD.

Advantage

Earwax is produced by two different glands found in the inner ear canal. They are the specialized form of the sweat gland, producing a watery secretion rich in antimicrobial compounds. The other gland is similar to the oil producing gland found in the skin. These glands secrete a mixture of sweat and oily substance that combines with dead skin cells to form the sticky, waxy substance we recognize as earwax. Also this combination creates a slightly acidic coating that discourages bacterial and fungal growth. Earwax plays an important role in ear health. It keeps your ears clean by protecting them from dust, dirt, and infections.

GOOD TO KNOW Your ear canal has a built-in conveyor belt. The skin lining the canal grows outward from the eardrum, toward the opening of the ear. Carrying earwax and trapped debris along with it. Jaw movements from chewing and talking helps this process by gently flexing the ear canal and loosening wax from the walls. Once earwax reaches the outer ear, it dries, becomes flakes and fall out on its own or washes away doing bathing.

Disadvantage

Earwax build-up untreated can lead to hearing loss, pain in the ear, irritation, dizziness, itchiness, ringing in the ears and a feeling of fullness.

Earwax blockage can happen to anyone. According to statistic, 10% of children and 5% of adults have it. Remember: cotton swabs are the most common tool people use for cleaning out their ears. Unknowingly, people don't realize they are doing more harm than good, by pushing the wax deeper rather than removing it. I know there are many over the counter home remedies encouraging you to use them. But, when you are dealing with a delicate inside body part, it's best you let the doctor do the cleaning.
